

The Status Of IPv6

RIPE NCC IPv6 Hackathon
Copenhagen Nov 2017

Why?

- You can only improve what you can measure!
- We lack a holistic view on IPv6

What!

<https://github.com/cteusche-ripenc/cc/status-of-ipv6>

<http://ipv6hack1.ripe.net>

- Created a webpage aggregating multiple data sources on and related to IPv6!
- Mainly based on routing data per ASN
- In progress:
 - Asbjørn: analysis based on registry data
 - Jasper/Steve: including RIPENESS

Future Work

- Including views aggregated on RIR region and industry affiliation
- Including more data sets (e.g. active measurements)

The Team

- Asbjørn Sloth Tønnesen <ipv6@asbjorn.st>
- Nico Heßler <ipv6hackathon@exmatrikulator.de>
- Kristina Hakobyan <hakkrist@gmail.com>
- Christoffer Hansen <netravnen@gmail.com>
- Ioana Livadariu <ioana@simula.no>
- Christian, Jasper and Steve
